The screenshot shows the homepage of drugstore.com. At the top, there is a navigation bar with categories: home, medicine cabinet, beauty & spa, nutrition & wellness, personal care, pharmacy, and specialty stores. Below this is a purple banner with the text "A very healthy way to shop, plus advice and information from drugstore.com." The main content area is divided into several sections. On the left, there is a search bar and a list of shortcuts including "your account", "your list", "shop by brand", "your shopping bag", "service center", "24-hr. customer care", "drug prices & information", and "help". The central part of the page features a large advertisement for "free bath bliss" with images of Garden Botanika products and text: "Get a fizzy and fragrant Garden Botanika tub kit (\$20 value) FREE with purchase." Below this is another advertisement for "a very healthy way to shop" featuring Eucerin sunscreen with the text: "Play, but don't pay with a sunburn. Check our sunscreen selection before heading outdoors." On the right side, there is a yellow box with a welcome message: "Welcome to drugstore.com. Come on in! (sign in)" and a link to "Get free newsletters & expert advice. Sign up today." Below that is a "pharmacy" section with the text "from RITE AID & drugstore.com" and a list of services: "Fill prescriptions", "Drug Prices & Information". To the right of the pharmacy section is a teal box with the text "we have the best brands" and an image of Tylenol, with an orange arrow pointing to it. Below this is another teal box with the text "Stock your medicine cabinet with name brands, NOW 10% OFF, including Tylenol." At the bottom right, there is a purple box with the text "great deals" and "Fresh savings for a new season." The bottom of the page shows a Windows taskbar with the text "Dokument: Übermittelt" and various system icons.

*This little-known FDA regulation allows Americans to legally obtain
foreign medicine for personal use:*

"Guidelines are flexible to accommodate patients who go to Mexican (foreign) pharmacies for alternative or less expensive treatments. Congress voted on narcotics and other controlled substances, permitting 50 dosage units without prescription."

— Dr. M. Friedman, FDA Deputy Commissioner (The Los Angeles Times-May 24, 1999)

"Food and Drug Administration (FDA) Law allows a 90-day drug supply (from foreign pharmacies) without prescription but will permit a six-month supply

Tierra Marketing's VITAMAN

PREGNENOLONE, A FRUIT OF CHOLESTEROL

The following information comes from Dr. Ray Peat, who has done pioneering research on the anti-aging steroids, pregnenolone, progesterone and DHEA (Dehydroepiandrosterone). I have included excerpts from his writings plus the results of interviews. Research references are provided when available, but in many cases, I could only describe the group of researchers who did the experiment. My purpose for this article is not to start a riot but to illustrate why I think it's dangerous to artificially inhibit cholesterol formation in your body with drugs and synthetic foods.

Dr. Peat accidentally discovered the effects of pregnenolone when he took some vitamin E containing a residue of pregnenolone that was left over from an experiment in solubility. Peat had been suffering from a variety of complaints, including "inflammation of the arteries, dental abscesses, asthma, migrants, and colitis." When he took the vitamin E containing some pregnenolone, he immediately felt better, but got sick again when he stopped. Suddenly remembering the presence of pregnenolone in the vitamin E, he crawled out of his sick bed, took a pinch of pure pregnenolone and felt immediately better. All of his symptoms gradually disappeared and in ten weeks, his appearance changed. Many aging characteristics, such as sagging skin, "chicken neck", bags under the eyes, etc. receded.
